

A guide to preventing food waste in manufacturing.

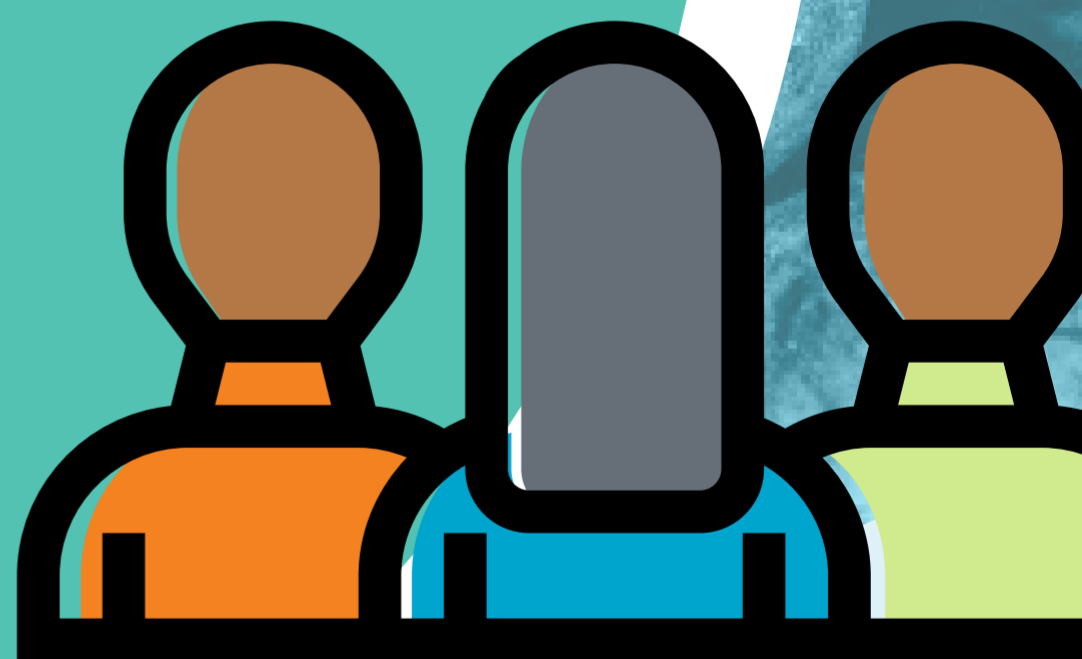

Set up measuring & monitoring plans to help identify your waste hot spots.

Turn your waste into income by working with other businesses and utilising technology.

Make changes to reduce your food waste at every level:

- Train your staff
- Eliminate unnecessary processes
- Upgrade equipment
- Minimise or transfer your losses
- Improve your inputs and outputs

Reducing food waste and making use of resources is a great way to cut costs while tackling climate change.
