

# The Recite Me assistive toolbar

## Who does the toolbar help?

Recite Me assistive technology is available on Zero Waste Scotland's website and can be used by anyone!

We want to ensure you can customise your digital experience in a way that best suits your individual needs. 90% of people do not have access to the assistive technology they need and we are breaking down this barrier, particularly for those who may have a disability, learning difficulty, visual impairment, or speak English as a second language.

## Toolbar accessibility features

### Screen reader

The screen reader helps visitors to perceive and understand our digital content by reading aloud website text, which can be customised to suit the viewer.

### Reading aids

The accessibility toolbar provides five main tools; a ruler, screen mask, magnifier, margins, and a dictionary.

### Styling and customisation

The toolbar allows people to change the way our website looks. Users are able to customise the website's colour scheme as well as the text, font style, size, colour, and spacing.

### Translation

Users can quickly and easily translate all our web content into over 100 languages, including 65 text-to-speech voices.
