

# NATURE-SPOTTING AROUND THE BEACH

## SHORE-DWELLERS

Aquatic mammals can be spotted here. They can get tangled in plastic packaging of all kinds, causing injury or starvation. Please dispose of your waste responsibly.

## COMMON AND GREY SEALS

Like other marine life, these animals are sometimes attracted by food remnants in discarded cans and plastic containers. Don't let your leftovers trap or injure wildlife.

## SEABIRDS

You might find sea birds here. If they find plastic bags and food wrappers they may mistake them for food and choke or get trapped, leaving them unable to hunt or escape from predators.

## WATERFOWL

Wild birds can be seen here. Discarded fishing gear can kill them – through swallowing hooks or entanglement in fishing line. Never leave fishing line behind, even if it's broken.

**EVERY YEAR, THOUSANDS OF ANIMALS IN SCOTLAND ARE HURT OR KILLED BY LITTER.  
DON'T LEAVE IT. BIN IT.**
